

Project Initialization and Planning Phase

Date	1 October 2026
Team ID	6ab224f9f32d8c9d8b2253f9
Project Name	Import data using transform maps
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
Applicant seeking a loan	Secure a loan for property	Married with no co-applicant income	Self-employed with a good credit history	Optimistic about loan approval

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A male applicant seeking a loan.	Secure a loan for the property	Married with no co-applicant income.	Self-employed with a good credit history.	Optimistic about loan approval.

Problem Statements for Import data using transform maps:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A data administrator importing records from a spreadsheet.	Import external data into a ServiceNow table.	Source column names and formats don't match the target table fields.	The data comes from an external file with a different structure.	Frustrated and unsure about data accuracy.
PS-2	A business analyst loading bulk records.	Import records without creating duplicates.	Duplicate and inconsistent records appear after the import.	No coalesce field or validation script is set in the transform map.	Concerned about data quality.
PS-3	A support team member relying on imported data.	Use accurate imported data in daily work.	Errors in the import are found only after the data is loaded.	Import logs and error handling are not reviewed.	Confident once the import is mapped and validated.
