

Empathy Map

Date	1 October 2026
Team ID	6ab224f9f32d8c9d8b2253f9
Project Name	Import data using transform maps
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I need to load this spreadsheet into ServiceNow today." • "Why don't these columns match the target table fields?" • "Can we avoid creating duplicate records?"	THINKS • Will the data import correctly the first time? • Is my transform map set up properly? • Bad data could affect other teams using the table.
DOES • Uploads the Excel/CSV file through a Data Source • Maps source fields to target fields in the transform map • Reviews import set rows and logs for errors	FEELS • Frustrated when fields don't match • Anxious about duplicates and data quality • Relieved when the import completes cleanly

DATA ADMIN
(ServiceNow Admin / Data Import User)
