

Code-Layout, Readability and Reusability

Date	1 October 2026
Team ID	6ab224f9f32d8c9d8b2253f9
Project Name	Import data using transform maps
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability:

This document evaluates the quality of the codebase in terms of its structure, readability, and reusability. Well-organized code with proper naming conventions, comments, and modular design ensures that the project is maintainable and can be extended or reused in future development.

Code Layout Checklist:

S.No	Code Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent Indentation	Uniform spacing/tabs used throughout the code	Yes	Transform scripts use the same indentation.
2	Proper File Structure	Files and folders are logically organized	Yes	Data Source, Import Set table and Transform Map are named clearly and kept in one Update Set.
3	Meaningful Variable Names	Variables reflect their purpose clearly	Yes	Variables are named after the source and target fields they hold.
4	Function / Method Names	Functions are descriptively named	Yes	Helper functions describe what they do.
5	Code Comments	Inline and block comments explain logic	Yes	Each transform script has a short comment on its purpose.
6	Modular Design	Code is split into reusable functions/modules	Partial	Cleanup logic is reusable, but some logic is still inline in onBefore.
7	No Redundant Code	Duplicate or unused code is removed	Yes	Unused field maps and test scripts were removed.
8	Error Handling	Exceptions and errors are handled gracefully	Yes	Invalid rows are skipped and logged instead of stopping the import.

Reusable Components / Modules:

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Data Source (Excel/CSV)	ServiceNow Data Source	Repeat imports of files in the same format	High
2	Import Set staging table	ServiceNow table	Every import of this file type	Medium

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
3	Transform Map (field maps and coalesce)	ServiceNow Transform Map	Other imports into the same target table	High
4	onBefore transform script (cleanup and validation)	JavaScript (Glide API)	Other transform maps that need the same cleanup	Medium
5	Update Set with the import configuration	ServiceNow Update Set	Moving the import setup between instances	Medium

Overall Code Quality Assessment:

Aspect	Rating (1-5)	Comments
Code Layout & Structure	4	Components are clearly named and grouped.
Readability	4	Scripts are short, indented and commented.
Reusability	4	Data Source and Transform Map can be reused for similar imports.
Documentation / Comments	4	Scripts are commented; more written notes could be added.
Overall Score	4	Well organized, with some inline logic left to move into helpers.
