

Data Flow Diagram

Date	1 October 2026
Team ID	6ab224f9f32d8c9d8b2253f9
Project Name	Import data using transform maps
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Customer, Payment Gateway).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Validate Request, Process Order).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., Customer Database, Inventory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Data Flow Diagram: Import data using transform maps

The diagram below shows how data moves from the Data Administrator through the Data Source, Import Set table and Transform Map into the target table, and how the results are reviewed.
